Forest Management Area (FM) and Number of Chain of Custody Certificates (CoC) 2015 – 2022

Forest Management Area (FM)

Number of Chain of Custody Certificates (CoC)

Data as of July 2022.

Key Market Drivers

Changes in purchase behavior.

International buyers committed to good forest management endorsed by FSC.

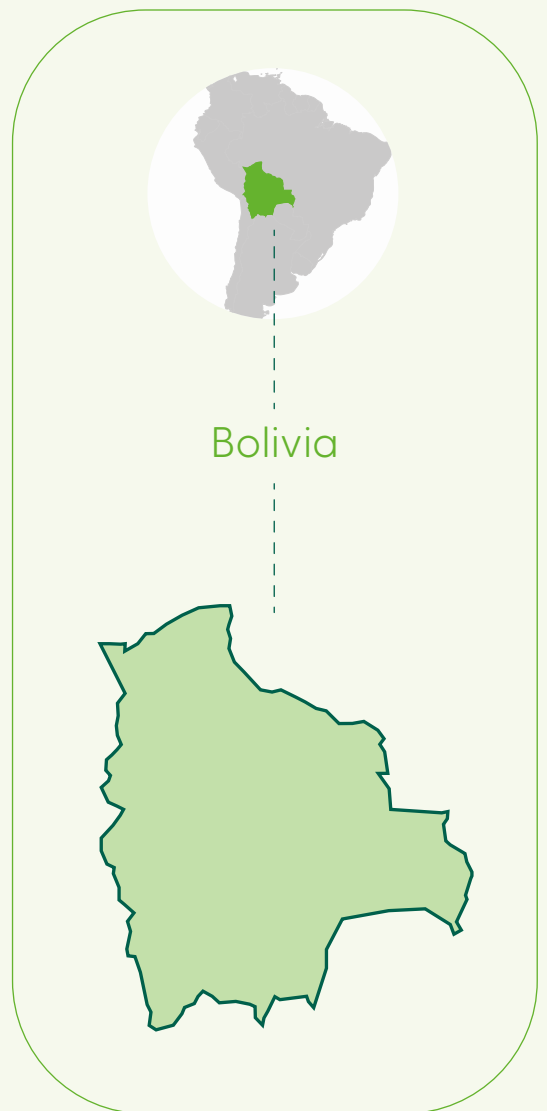

Effective government control to ensure legal control of timber.

CFV/FSC Bolivia

The Bolivian Council for Voluntary Forest Certification (CFV) was created on June 12, 1995, as a non-profit civil association; with the mission of promoting sustainable forest management through voluntary forest certification, adopting the values and principles of the FSC.

The development of forest certification in Bolivia is not only due to factors of competitiveness in the international market (demand), but also to the efforts of institutional initiatives. As a Network Partner, this effort earned Bolivia the recognition of FSC International in 2005 for its world leadership in certified tropical forests. The country led the region this same year by reaching 2'209,084 ha certified FSC.

Since 2007, the certified forest area in Bolivia has decreased to 482,409 hectares (August 2019), however, in the last 3 years important areas have been recovering, reaching 897,584 hectares as of June 2022
